## VCO Virgin Bituminous Coal Activated Carbon

BakerCorp's VCO granular activated carbon is made from a selected grade of bituminous coal. This carbon is ideal for purification of potable water, industrial wastewater treatment and groundwater treatment. This product is also suitable for refinement of organic liquids requiring purification and color reduction. VCO-L complies with AWWA B604-96 and Food Chemicals Codex standards.

### PHYSICAL PROPERTIES:

Bulk Density:	29 lbs / ft <sup>3</sup>
Moisture Content (as packed):	5% maximum
Hardness (Ball Abrasion):	90% minimum
Ash Content:	12% maximum
Iodine Number:	1,000 minimum
Mesh Size:	12x40

Standard Packaging: 1000 lb. super sacks. Other packaging available upon request.

These specifications represent general parameters and are subject to change. Please consult with BakerCorp before processing with your applications.
